

PetSafe New Product Alert

Stay! Mat - The Wireless Crate™

Traveling with your dog and need a portable training solution? PetSafe is proud to introduce the PetSafe Stay! Mat Wireless Crate™, the first portable alternative to the traditional dog crate. An industry first, Stay! Mat provides an effective, safe and comfortable environment that allows you to interact with your pet without cage wires or plastic walls. The Stay! Mat is portable and enables you to spend time with your pet in places that are customarily off-limits with traditional crates. Your dog simply wears a receiver collar – if he leaves the mat, he will get a tonal or safe static correction, teaching your dog to “stay” in one place. Now your dog can go where you go! Battery operated and water resistant, Stay! Mat is lightweight and easy to clean with a removable machine washable cover. Available in three sizes – small, medium and large. Operating and training manual included.

How it Works

The Stay! Mat functions by detecting your dog's weight on the mat. If your dog leaves the mat while the unit is turned on, the mat will send a radio signal up to 6 feet in all directions. The receiver collar will receive the radio signal and produce a beep or beep and mild static correction until your dog returns to the mat. The correction type depends on the setting you choose. Once your dog returns to the mat, the beep and static correction will cease. (Two week training period required.)
