New Yard Trainers Make Outdoor Activities with Pets Easy

Knoxville, Tennessee – February 3, 2003 – Two new yard trainers from SportDog are ideal for teaching dogs the basics or to begin serious training for bird hunting. They are part of a complete line of new products by SportDog that make gun dog training easier and more affordable. These trainers use breakthrough technology from Radio Systems for unmatched reliability and ease of use.

These are great trainers for working in the yard or around the house with your dog,” said Lance Tracy, Director of Sales and Marketing for SportDog. “Because they are so affordable and easy to use, they are ideal for obedience training as well as starting a dog on field commands.”

The SportDog yard trainers have a 100-yard range that is sufficient to work with dogs around the yard, park and other environments. The regular Yard Trainer is for small-to average-size dogs and the Stubborn Dog Yard Trainer is for larger or stubborn dogs. They both feature a waterproof collar/receiver and a safety shut-off mechanism. They’re designed to be very simple to use, with ten correction levels that can be set easily with a thumbwheel on the transmitter. In addition to being very affordable, both of these trainers are backed by a lifetime warranty.

SportDog specializes in products for hunting enthusiasts and people who enjoy outdoor activities with their dogs. Products include remote trainers, yard trainers and tracking devices to aid in hunting.

SportDog is a subsidiary of Radio Systems Corporation, the maker of PetSafe brand products. Based in Knoxville, Tennessee, the company is the industry leader and prime innovator in the development of safe, reliable and technologically superior pet management solutions. Products include electronic containment systems, bark control systems, pet doors, remote training equipment and tracking/locating systems. More information is available at the company's Web site at www.sportdog.net.
