

A Purrfect New Product

PetSafe Simply Clean™

The Continuous Self-Cleaning Litterbox System

Ready for a litterbox that doesn't use a scoop or rake? PetSafe is proud to introduce Simply Clean™ – the only eco-friendly litterbox that continuously cleans without disturbing your cat. This is the first litterbox that has no visible moving parts, continues rotating 24 hours a day and allows you to recycle! You can use plastic grocery bags in the waste container – saving both money and the environment. Just plug into a standard wall outlet – it uses the same amount of electricity as one Christmas tree light bulb.

How it Works

The Simply Clean™ LitterBox System has no visibly exposed moving parts. The litter bowl rotates slowly at a rate of one rotation per hour. So, the system is quiet, safe and convenient for you, your family and your pet. The Simply Clean™ Litter Box System reduces odor-causing bacteria by continuously removing waste from the litter bowl and moves it up the conveyor system. The waste is then discarded into a built-in receptacle automatically, 24 hours a day. So, your cat's litterbox is always fresh and ready for use.
