

PetSafe New Product Alert

Petsafe® Outdoor Bark Control

Experiencing sleepless nights from your neighbor's barking dog? Or maybe you're receiving embarrassing calls about your own dog's barking? Don't call the moving company just yet – help is on the way. PetSafe is excited to introduce a new bark control device that stops outdoor nuisance barking – The Petsafe® Outdoor Bark Control. There are no collars to buy or unattractive equipment to put in your backyard. You simply hang this decorative, weatherproof unit in the shape of a birdhouse on a tree, wall or fence post and let the internal microphone teach your dog to stop barking.

How it works:

When the PetSafe Outdoor Bark Control is within range of constant barking, an internal microphone picks up the sound. The unit then emits an unpleasant, but non-harmful, high-pitch ultrasonic sound. The ultrasonic sound can only be heard by the dog (not humans). Remember that dogs have far greater hearing than humans. They are able to determine the direction a sound is coming from much more accurately than we can. Startled by the high-pitched sound, the dog should stop barking, as it will associate its bark with this unpleasant noise.

The PetSafe Outdoor Bark Control should be placed facing the dog and within range of the dog. The unit is designed with provisions for hanging or mounting and should be positioned at a height of no more than 5 feet. The Outdoor Bark Control can also stand alone.

Other features include:

- Decorative, durable and weatherproof design for use in any yard
- Detects bark up to 50 feet away
- 4 levels of operation
- Battery operated (9-volt battery not included) and includes 2 color LED lights for good/low battery indication
- Lifetime Limited Warranty
- Safe and effective for all sizes and breeds of dogs
- Cost: \$49.99
