Radio Systems Corporation Introduces New Products in Canada

Knoxville, Tennessee – November 21, 2005 – Radio Systems Corporation, home of the PetSafe brand and the world's leading manufacturer of electronic pet training products and pet doors, brings a grouping of new products to the Canadian market.

New Products Include:

The Wellness Bed – Early product research highlighted consumer interest in making their pet's environment as comfortable as possible. The Wellness Bed features a choice of radiant heat and massage, all embedded in a dense egg-crate, foam mattress. The massage cycles to provide maximum comfort and "pet appeal". The Wellness Bed includes a washable cover, and comes in sizes scaled to accommodate pets ranging in size from cats and toy breeds up to the largest canines.

Deadbolt Security Pet Door – Research repeatedly shows one of the main reasons that consumers hesitate to get a pet door centers on concerns that the door cannot be locked. This unique, Hard-flap Pet Door features a four-way, deadbolt-type lock. Two metal bars provide the strongest, four-way locking system available in today's pet door market. It can be completely unlocked or locked against entry, exit or both entry and exit. The Deadbolt Security Pet Door is available in small, medium and large sizes

Lemon Scented Spray Bark Control Collar – In response to pet owners' desire for a better spray bark control collar for controlling unwanted barking, Radio Systems developed the most advanced Spray Bark Control Collar available. This advanced Spray Bark Control Collar delivers twice the number of sprays per refilling as any other collar available, has a longer battery life and features both a low-battery and a low-spray indicator. The consumer is very interested in a spray collar that utilizes something other than citronella to deter barking, so PetSafe developed a more appealing, lemon-scented spray that proved very effective in home placement tests.

About Radio Systems Corporation

Radio Systems Corporation (RSC) is the maker of PetSafe brand products -- safe, reliable and technologically superior pet management solutions that give responsible pet owners greater peace of mind knowing their pets are safe and well cared for.
