C O R P O R A T I O N

March 11, 2010

Radio Systems Corporation announces the acquisition of product rights and Trademarks of its popular WINDOOR and CAT VERANDA products by businessman/inventor Charles Dawes. Dawes previously received royalties from Radio Systems Corporation for use of the design of his window-adaptable pet door patent (United States Patent No. 7,150,244) in connection with the WINDOOR and CAT VERANDA products.

Over 10,000 units of the WINDOOR and CAT VERANDA products were sold by Radio Systems Corporation who introduced the products approximately two years ago. Both products allow the cat owner a weather tight, easy to install, design that adjusts into most vertical sliding case windows. Each boast a lockable hard-flapped access door for cats up to 20 pounds. The WINDOOR allows the cat access to the outdoors and the CAT VERANDA provides a safe enclosure allowing the indoor cat to enjoy the outside without subjecting it to predators and dangers. The WINDOOR and CAT VERANDA will no longer be manufactured or sold by Radio Systems Corporation. Manufacturers and other parties interested in these products are encouraged to contact Hall & VandeSande, LLP, 10220 River Road, Suite 200, Potomac, MD 20854; (301) 983-2500 for information.
